

“Dead cool capacitive-touch cockpit”

Smart touch® HMI connectivity brings your home and office to the vehicle cockpit for the first time....

- *Elegant, uncomplicated, iPhone-like design*
- Operates at the speed of thought...
- *Unparalleled level of customized in-vehicle connectivity*

Ultra sleek, smooth sculptured display surface *comes alive* with a simple hand sweep (instead of traditional buttons and switches) to control music, navigation, climate, and other cockpit systems.

Enhances care and comfort with these features:

- Wide design freedom in instrument panel styling/function
- iPhone-like styling all customers desire
- Reconfigurable screen/personalized app friendly
- Easy to use screens reduce driver distraction
- iQ Power® systems improve functionality / cost less than knobs/buttons
- Reliability breakthrough
- Brilliant display; vibrant colors

smart Touch® .. the new standard of *comfort*
