

Keyless Entry System

Capacitive sensing
human gesture recognition entry control and power closure systems

Hands-free Smart Open™ features:

- Eliminates need to set items down or touch vehicle when hands are full to open or close liftgate/trunk
- No need to touch dirty vehicle for open or close functions
- Highly personalized gesture provides total level of security
- Nameplate activation creates brand loyalty
- Keyless entry for all power closures
- Personalized and convenience option
- Secure keyless entry

Secure keyless entry **Smart Open™** responds to the driver's presence and uniquely reads a personalized gesture to magically open the power liftgate/trunk
